

engagementreport

Overview of all activities conducted by Raiffeisen KAG in implementation of its engagement policy

Responsibility

as an investor

"Engagement" is a broad term that covers corporate dialogue and the exercise of voting rights. But it is also often simply used as a synonym for dialogue with companies. Corporate dialogue and the exercise of voting rights are intended to make use of all rights and opportunities that a shareholder has in respect of a company in which he has invested. This is called "active ownership". Engagement can take the form of informal conversations, often called "soft engagement", standardised dialogues, or the use of formal channels by way of voting at annual general meetings. Which specific form of engagement is most likely to lead to success depends on the particular situation. If soft engagement and mere dialogue do not bear fruit, investors still have the option of having a public effect on the company by exercising their voting rights and speaking at the annual general meeting.

As one of Austria's leading asset managers, Raiffeisen Kapitalanlage-Gesellschaft (Raiffeisen KAG) is conscious of its fiduciary responsibility to its customers. As part of this, it actively engages with companies in order to best preserve its customers' interests. Engagement can serve different purposes: on the one hand, it is used for a more careful assessment of companies' financial situation and development. This provides a look behind the scenes, so to speak. On the other hand, in conjunction with a proactive approach, engagement on ESG* issues helps companies move towards improvement in corporate social responsibility (CSR) and sustainability. For the company and ultimately for the owners as well, this improvement should lead to "sustainable" benefits, which are reflected over the long term in better operating results.

"Engagement" is a broad term that covers corporate dialogue and the exercise of voting rights. In terms of corporate dialogue, Raiffeisen KAG makes a distinction between proactive engagement and responsive engagement. Proactive, constructive dialogue with companies serves to identify potential financial and non-financial opportunities and risks, and addressing current events in a targeted manner via responsive dialogue allows for an accurate assessment of the company in the context of its environment and potential risks. The exercise of shareholders' voting rights occurs either directly or indirectly via proxy. Raiffeisen KAG acts according to internal principles which are based on a transparent, sustainable corporate governance policy and cover significant topics that regularly arise at annual general meetings.

^{*} ESG stands for environment (E), social (S) and corporate governance (G).

Proactive, constructive dialogue with companies serves to identify potential opportunities and risks.

Corporate dialogue

>> In addition to primary and secondary research, Raiffeisen KAG uses corporate dialogue to get a clearer picture of the financial situation of companies and to ascertain to what extent ESG aspects are taken into account in the company. Corporate dialogue can take the form of direct and indirect contact, company visits, conferences, and conference calls. Corporate dialogue plays a particularly important role in the context of sustainability. This is often initiated on the basis of relevant current topics such as electromobility, palm oil, and microplastic. In such cases, Raiffeisen KAG takes a thematic approach to several companies from the same sector so as to be able to compare the engagement results.

Fundamentally speaking, Raiffeisen KAG distinguishes between three forms of corporate dialogue:

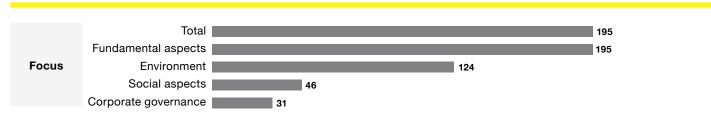

- a) Direct corporate dialogue in the form of individual conversations or group meetings, with a focus on the company and its specific efforts in ESG issues.
- Direct corporate dialogue as part of thematic or sectoral research, with a focus on the theme or sector-specific ESG factors.
- Direct and indirect corporate dialogue are part of the collaborative engagement process, in the course of which we work together with other ESG-minded investors and broadly address a certain thematic area of focus. Generally, the relevant topics are defined by the PRI and its initiatives for collaborative engagement. In this process, a company can function as the "Lead Investor" or as a "Supporting Investor". Lead Investors prepare the corporate dialogue in detail and arrange contacts with companies; Supporting Investors are integrated into the dialogue and also support the process with content to some extent.

The results of engagement in various different topics are published regularly in the NACHHALTIG INVESTIEREN sustainability newsletters.

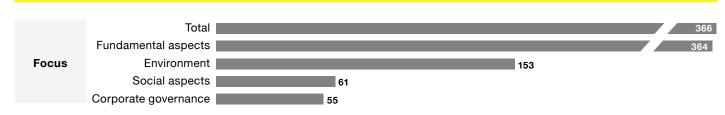

Corporate dialogue activities conducted by Raiffeisen KAG in 2021:

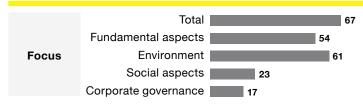

Individual conversations

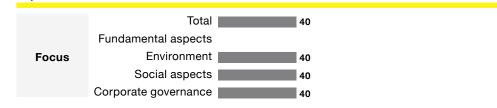

Group meetings

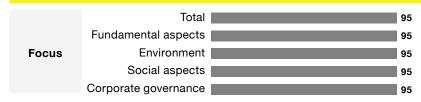

Thematic research

Impact research

Collaborative corporate dialogue

Note: Topics from multiple areas can be discussed at the same time during a single corporate dialogue meeting.

Some examples of our activities:

Bayer

The company was founded in Wuppertal, Germany, in 1863 and is one of the world's largest chemical and pharmaceutical enterprises with turnover of EUR 43.5 billion in 2021 and 104,000 employees. In 2016, the acquisition of US company Monsanto, which is known primarily for its production of fertilisers, was viewed by many investors as highly controversial. But the fertiliser segment - which is harmful to the environment to a certain extent - has not been the only cause for concern for Bayer since then; the associated production of white phosphorus also creates difficulties. ISS ESG has added white phosphorus munitions to the categories of weapons covered by its Controversial Weapons Research, because many investors consider them to be controversial weapons. Although these weapons are not controversial per se because they can be deployed carefully without presenting a risk due to their incendiary effects, they have in fact been used as incendiary weapons in conflicts, for instance in 2016 by the Israelian army against the civilian population. White phosphorus is not prohibited by the Geneva Convention. However, this weapon causes horrific injuries when used against people and results in a long and painful death. We discussed this topic with high-ranking repre-

sentatives of Bayer, and expressed our concern.

According to Bayer, Monsanto operates the world's largest phosphorus mine in Sulphur Springs, USA. The ore that is extracted forms the main component of glyphosate fertiliser. Due to the relatively low turnover from that segment as seen from a company-wide perspective, this has been a niche business for Bayer until now. In general, there are significant differences between Europe and the USA when it comes to weapons. Long-term supply contracts are in place between Monsanto and the US Department of Defense.

However, the topic of white phosphorus is being discussed internally at the company more and more often, in part thanks to pressure from sustainable investors and the resulting sale of many positions. In the discussion with the company, Raiffeisen Capital Management also expressly stated that this segment should be sold off. At the same time, the Sustainability Office at Bayer is calling for a rapid solution to this matter. The topic has thus been prioritised and will be solved one way or another before the end of 2022 according to statements from Bayer. Further discussions with Bayer are planned for 2022 in order to remain up to date regarding the white phosphorus issue in particular.

Essity

Founded in 1927, the Swedish company Essity is an important player in the hygiene and health products segment, with turnover of EUR 11.6 billion and 46,000 employees. Its shares have been traded on the Stockholm stock exchange since 2017 and the company considers itself a leading enterprise in the area of sustainability. In addition to several other topics, we primarily discussed the issue of FSC certification in our engagement (which included a discussion with President and CEO Magnus Groth as well as other activities). FSC stands for Forest Stewardship Council, which is an international certification system for more sustainable forest management. Wood used for furniture, toys, books, exercise books, and pencils with the FSC seal is derived from forests which are managed more responsibly. As 100% of the wood used by Essity is obtained from certified forests, the company is consequently limited to around 10% of the global fibre supply. Regionally, the greatest problem arises in Russia, but Essity compensates for this by sourcing materials from Nordic countries and Brazil. Intense work is being done to develop alternative fibre materials, for example by the so-called Mannheim Project, in which fibres are produced from wheat straw. For Essity, this means diversifying input materials and noticeably reducing greenhouse gas emissions. Our question about chemicals management apparently hit a blind spot at the company, as we were redirected to future meetings in this regard.

Hannover Rück

Hannover Rück is the third largest reinsurance group in the world, with gross premiums of around EUR 24 billion. Its headquarters are located in Hanover, Germany. Founded in 1966, the company is active in all segments of non-life and life reinsurance. It has a network of more than 170 subsidiaries, branches, and representative offices on all five continents with a total of more than 3,000 staff. We conducted engagement activities with this company in 2021 and covered several topics; the communication took place via e-mail, direct personal contact, and small group meetings. Hannover Rück responded with extensive answers on the topic of Sustainable Development Goals (SDGs). The company supports a number of SDGs that are all viewed as equally important. To be precise, Hannover Rück supplied details in connection with SDGs 1, 2, 5, 7, 9, and 10. ESG criteria are increasingly being taken into account in underwriting policies. In 2021, the company pledged not to enter into new business with coal power stations and coal mines. Hannover Rück aims to reduce the overall greenhouse gas footprint of its investment portfolio by 10% already in 2023. Diversity among staff is an important group-wide topic. Here, initiatives are under way to further increase the diversity at the company, promote equal opportunities, and improve staff training.

Flughafen Wien

Flughafen Wien AG operates Vienna International Airport, which is the largest and most well-known Austrian airport. It serves as the home airport and hub for Austrian Airlines, Ryanair, EasyJet, Eurowings, and Wizz Air. In addition to being the biggest employer in eastern Austria, the airport is a gateway particularly for flights to Eastern Europe and the Middle East. In 2019, the airport was connected to 217 destinations in 68 countries around the world by 77 airlines.

Especially in times of the coronavirus pandemic, it was very interesting for us to learn about the current state of business and the company's future prospects from management board members. Flughafen Wien informed us of a drop in turnover by two-thirds in comparison to 2019. A return to pre-crisis levels is expected by 2025, with the Asian markets playing a leading role in this.

With regard to the construction of the third

runway, it was noted that this will most definitely be based on the results of a feasibility analysis; currently, this project is about five years behind schedule.

Despite the current environment, the company strives not to reduce staff levels.

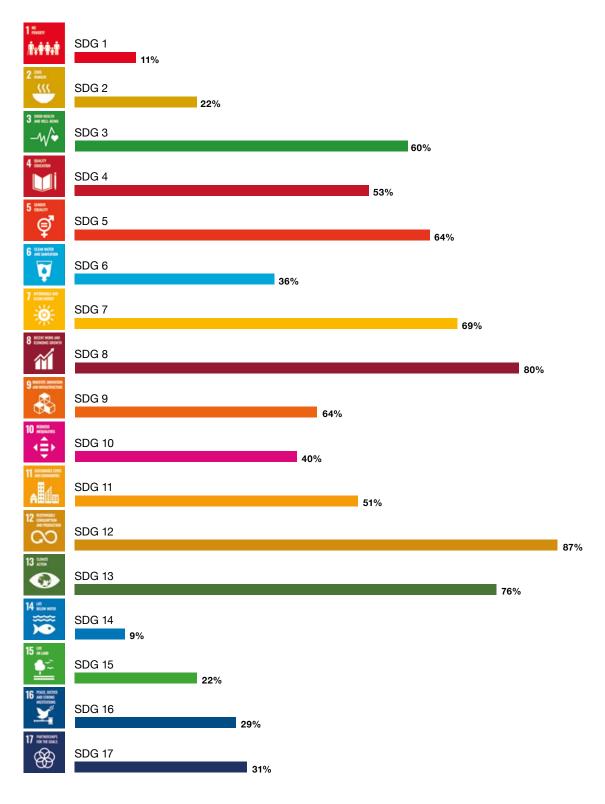

The objective remains to position Vienna International Airport as the first carbon neutral airport in the world. To this end, the biggest photovoltaic park in Austria is to be built, capable of producing up to 30 megawatts. Further expansion is easily possible as enough space is available around the airport for this. When questioned about the harmful impact on the environment by air transport in general, the board members were optimistic that significant contributions can be made towards climate protection through the use of synthetic kerosene. However, the necessary political framework still needs to be created by the EU in this connection.

Sustainable Development Goals (SDGs) Impact research

As in the past three years, one of our objectives this year was to assess the relevance of the 17 United Nations Sustainable Development Goals (SDGs) for the companies in our funds and to ask the companies about their contributions towards the achievement of these goals. The 17 SDGs entered into force in early 2016 and are intended to promote

sustainable development at the economic, social, and environmental levels. In order to perform this assessment, we developed a special questionnaire and sent it to more than 120 firms from our funds. The following chart shows how relevant the respective SDGs are for the companies that responded to our questions.

Relevance of the SDGs

Topic-specific

engagement

Raiffeisen Capital Management publishes a quarterly sustainability newsletter that always examines one specific topic from the area of sustainability in greater detail. The exchange of views with companies on the given topic forms part of this more detailed analysis. The following topics were featured in 2021, and the companies were asked the following questions with regard to them:

Biodiversity:

- Is the negative impact of our global food systems on biodiversity a problem that you consider relevant for your company?
- Are you actively monitoring your positive/ negative impact on biodiversity? What are the results?
- How can your company contribute towards
- achieving SDG 15? Have you set specific objectives?
- The world's population is predicted to increase by another two billion by 2050. Will it be possible to feed all these people in a sustainable manner? What role could your company play in this?

| Company | Fundamental aspects | Environment (E) | Social (S) | Corporate governance (G) |
|------------------|---------------------|--------------------|---------------|-----------------------------|
| governance (G) | | Х | | |
| Campbell Soup Co | | Х | | |
| Campbell Soup Co | | Х | | |
| Kellogg Co | | Х | | |
| Nestlè SA | | Х | | |
| Novozymes A/S | | Х | | |
| Unilever NV | | Х | | |

Demographic change:

- How does demographic change impact your company? To what degree are you benefiting from this, and what positive impacts can you generate?
- Do you see any significant differences that
- you must take into consideration?
- Demographic change has an influence on the required employee qualifications. How are you addressing this risk for current and future staff?

| Company | Fundamental aspects | Environment (E) | Social (S) | Corporate governance (G) |
|--------------------------|---------------------|--------------------|---------------|-----------------------------|
| Coloplast A/S | | | х | |
| Koninklijke Philips N.V. | | | Х | |

| Company | Fundamental aspects | Environment (E) | Social (S) | Corporate governance (G) |
|-----------------------------|---------------------|--------------------|---------------|-----------------------------|
| Smith & Nephew plc | | | Х | |
| Sonova Holding AG | | | Х | |
| Stryker Corp. | | | Х | |
| Zimmer Biomet Holdings Inc. | | | х | |

Energy transition:

- In your planning for upcoming projects, what is your assumption for future energy prices? In your opinion, what will the energy market of the future look like in general?
- In your view, what is the correct capital structure for a project in the field of renewable energy and how does this structure change during the course of the project?
- In our opinion, pressure on profit margins may arise due to the market entry of nume-
- rous large energy companies in the field of renewables. How significant do you believe this risk is?
- How can your company contribute positively towards achieving SDG 11? Do you have specific objectives in this area?
- What investments are planned at your company or are currently being made to reduce greenhouse gas emissions? How do you measure the success of these measures?

| Company | Fundamental aspects | Environment Social (S) | | Corporate governance (G) |
|-----------------------------------|------------------------|------------------------|---|-----------------------------|
| AKER OFFSHORE WIND AS | x | x | x | x |
| ENCAVIS AG | Х | Х | X | Х |

Carbon pricing:

- Is your company currently obligated to pay a carbon tax and do you participate in certificate trading?
- If so, has this pricing had an influence on the reduction of carbon emissions by your company and do you strive to achieve climate neutrality?
- Which greenhouse gases are emitted by your company and to what extent?
- What investments are being considered or

- implemented by your company in order to reduce its carbon footprint, and how is this measured?
- How is your company preparing for the future pricing of greenhouse gases?
- Which pricing method for greenhouse gases do you see as most sensible for your sector?
- What contribution does your company make to SDG 13, and how is this measured?

Exercising voting rights

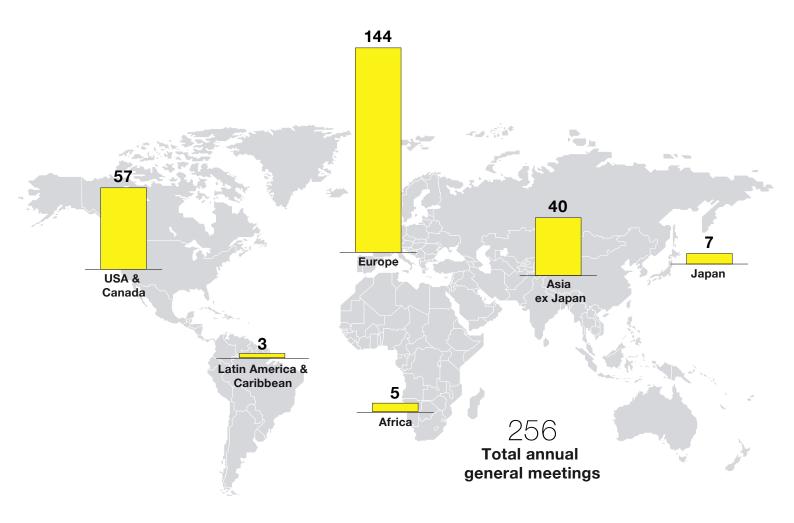

For Raiffeisen KAG, one of its key responsibilities as an asset manager is to exercise its shareholder voting rights. These rights are exercised personally at the respective annual general meetings or by way of proxy voting. Raiffeisen KAG has selected the independent firm IVOX Glass Lewis (IGL) for its proxy voting needs. Raiffeisen KAG's principles for exercising voting rights are based on a transparent,

sustainable corporate governance policy and are intended to cover significant topics that regularly arise at annual general meetings.

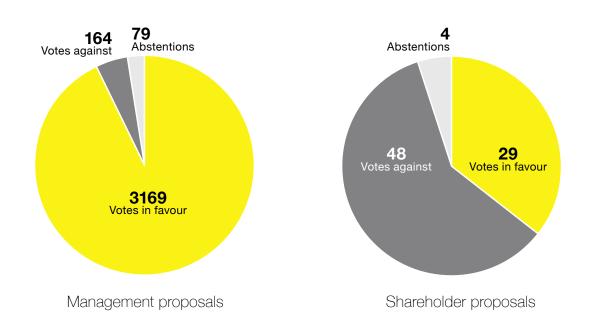

Some examples illustrate our approach. The annex contains a detailed depiction of our voting behaviour at the five most important annual general meetings as measured by the percentage share held in the respective company.

Annual general meetings by region

Management proposals and shareholder proposals

Collaboration

with other shareholders

As a signatory to the United Nations Principles for Responsible Investment (PRI), Raiffeisen KAG has undertaken to collaborate with other shareholders to enhance its effectiveness in implementing these principles. One possible form of this joining of forces is the PRI Collaboration Platform, a platform for collaborative engagement. The objective of this collaborative engagement is to initiate a change in thinking at the target companies so as to achieve greater transparency, and to ideally bring about actual changes in the behaviour of the companies.

The FAIRR Initiative, which Raiffeisen KAG supports, believes industrial livestock farming to be a material risk for financial inves-

tors and to be incompatible with the principles of sustainable food production and development. FAIRR sees itself as the coordinator of an international network of investors aiming to minimise the medium- and long-term risks to ensuring an adequate food supply for the population. The animal suffering associated with industrial farming is to be reduced at the same time.

The annex contains a list of the companies addressed under these two initiatives under "Engagement activities in 2021".

Conflicts of interest

Raiffeisen KAG strives to prevent conflicts of interest relating to its engagement or to solve or handle such conflicts in the interests of its investors (for example conflicting voting behaviour between it and a company associated with it by way of direct or indirect control). To achieve this goal, Raiffeisen KAG acted in accordance with its conflicts of interest policy, which can be viewed at **www.rcm.at/corporategovernance**, when conducting its engagement activities.
