This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## FWR Titanium Euro Fund of Funds

(ISIN: HU0000714803)

Fund Manager: Raiffeisen Befektetési Alapkezelő Zrt., a member of the Raiffeisen Bank Group

### Objectives and investment policy

The FWR Titanium Euro Fund of Funds is a moderate risk fund with the aim of investing into other investment funds to achieve the highest possible capital gain.

The fund's capital can be invested in liquid assets (bank deposits, government bonds), other investment funds or other collective investment vehicles. The fund mainly buys shares of other mutual funds that have a global focus and their primary purpose is to create a dynamically managed, diversified portfolio structure.

The units of the fund may be purchased and redeemed on any trading day. All working days are trading days except for those that are designated by the distributor as trading holidays – in accordance with the statutory provisions – or on which trading

is suspended due to extraordinary circumstances.

Derivative instruments can only be used for hedging purposes (with a view to reducing risks).

The fund primarily invests in instruments denominated in Euro, but the currency exposure of the underlying investment funds may be diverse.

The fund is a reinvesting fund, meaning that it reinvests the income it generates.

This form of investment is best suited to investors with a middling risk appetite, who have an average risk-bearing capacity.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 2 years.

### Risk and reward profile

- The synthetic indicator related to the risk rating above is based on the fund's target risk level.
- The classification of the fund under category 3 based on the risk/reward profile is attributable to the fund manager's endeavour that the fund's investments are selected in a way that most likely the maximum possible loss of the fund would not exceed 10% in a year.
- The past data used for the calculations are not necessarily reliable indicators of the fund's future risk profile.
- The designated risk/reward profile is not guaranteed to remain unchanged, and the categorisation of the fund may shift over time.
- Not even the lowest category can guarantee a risk free investment.

The following are the risks that are not taken into account when assigning the risk category, but that are of significance in terms of the fund:

**Credit risk:** Some of the fund's assets are invested in bonds and/or money market instruments (directly or in the form of

credit derivatives). There is a risk that the issuers may become insolvent (or that their credit quality deteriorates), and that these bonds and/or money market instruments (or credit derivatives) lose their value in part or in full.

**Liquidity risk:** There is a risk that a given position cannot be sold in time at an adequate price. This risk may lead to the suspension of redemptions of the investment fund units.

**Counterparty risk:** The fund concludes transactions with various contractual counterparties. There is a risk that these contractual counterparties do not satisfy the fund's requests owing to, for example, insolvency.

**Operational risk:** There is a risk of loss caused by a disturbance in internal procedures/systems or by external events (for example, natural disasters). Safekeeping carries a risk of loss in respect of the fund's assets that may be caused by the insolvency of the custodian or sub-custodian or the violation or abuse of its obligation to act prudently.

**Risk arising from the use of derivative transactions:** The fund is permitted to execute derivative transactions only for hedging purposes, and therefore the use of derivative transactions increases the risks of fluctuation in the price of the fund's units primarily through counterparty risk.

**Model risk:** In extreme market conditions changes in the fund's unit price may be higher than projected by the used risk management model.

---

## Charges

---

The fees paid to the fund serve to cover the costs of the fund's operation and include the costs of marketing and distribution. These charges reduce the potential growth of the investment in the fund.

### One-off charges taken before or after you invest

Entry charge	maximum 3%
Exit charge	maximum 4%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charge	1.19%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit fees indicated are the maximum chargeable percentage values. Instead of the percentage fee, a fixed fee

may be charged, which can be a percentage fee plus a minimum fee or a separate fixed charge. This means a maximum of EUR 10 in the case of the entry and exit charges alike. In certain cases the fee may be lower than this; please ask for your financial advisor's assistance in this matter!

The ongoing charges figure shown here is an estimate of the charges. The estimate was applied due to the audit of year 2017. The fund's annual report for each financial year will include detail on the exact charges made. The ongoing charge do not include mandate fees, commissions and transfer charges related to securities trading, except for the entry and exit fees charged when the fund invests in other collective investment securities.

Additional information about fees can be found on pages 61-67 of the fund management regulations at the following link: <https://alapok.raiffeisen.hu/aktualis/tajekoztato>
